

NCE TRIGGER-GRIP* CAMERA HANDLE

***Specially Designed to Fit ALL
Filmo 70 Series Cameras
and Filmo 240 TA Camera***

Trigger-Grip makes it easy to shoot hand held movies and assures better photography. A spring loaded trigger shutter release depresses a stainless steel hook extension over the top of the Filmo Camera to release regular camera button.

Tripod screw at the bottom of the handle holds camera securely in place.

Contour of trigger-grip handle permits steady hand support with one hand, while depressing trigger with the other hand.

Sturdily built of cast aluminum construction.
In beautiful brown wrinkle finish.

* Patent Pending

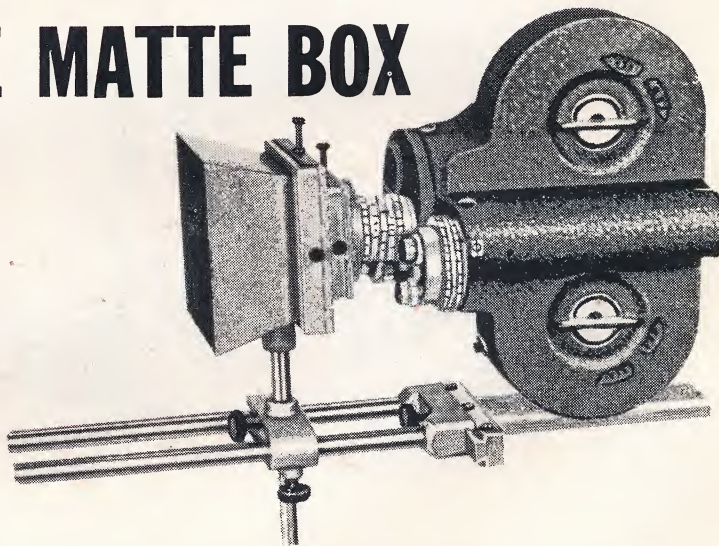

LIST PRICE \$35.95

8/16mm SUNSHADE MATTE BOX

***for
Filmo - Cine Special - Bolex - Etc.***

The NCE Combination Matte Box and Sunshade is made to fit ALL semi-professional and professional 8 and 16mm cameras. Will take ALL lenses from 15mm to 152mm. For use with 2" square and 3" square glass or gelatine filters, various accessories such as gauze holders, diffusion filters, effect filters, etc.

Made of aluminum casting with dural front rods. Rubber back caps are supplied to avoid back flare when lens used is smaller than the back opening. Fibre filter holders are supplied in both 2" sq. and 3" sq. sizes for holding the gelatine filters or gauzes. The base fits all cameras and has both large and small tripod threads. The interior of the matte box is finished in optical black. When used with the Cine Special Cameras, the magazines may be removed without removing the camera from the tripod.

Will fit most cameras by simply adjusting the brackets for height and side alignment. For some cameras a finder extension bracket may be required. For the Auricon cameras, as well as the Maurer cameras, adapters may be purchased directly from the manufacturer. For use with the Cine Special optical viewfinder, 4 extension screws are required, these are also available from the manufacturer.

35mm NCE VIEWER

SHARP, CLEAR and BRILLIANT PICTURE 3¼" x 4¼"

***Easily Adaptable as a
Combination Viewer and Synchronizer
Assembled to Your Specific Needs***

This new and advanced Model NCE 35mm Film Picture Viewer combines the functions of viewer, synchronizer, footage counter, and frame counter — all in one unit. Precision-built in every detail for top performance and durability. Embodies many exclusive advantages plus features found only in much higher priced units.

It can be used with a sound reader for single system; also available with additional 35mm or 16mm for double system editing of film. Soundheads for magnetic tape can be added to additional sprockets for any number of magnetic tracks.

Picture size is 3¼" x 4¼". The precision built-in optical shutter provides smooth projection of running picture; or of single frame for frame-by-frame editing. Picture is always clear and sharp, in perfect focus whether film is moving or stopped. No danger of overheating at any time. The picture can be viewed for periods of time without fear of burning or damage to film or sprocket-holes. Adjustable focus knob is provided for sharp and clear picture viewing.

In front of the Viewer Assembly any combination of 16mm and/or 35mm synchronizer sprocket assemblies can be made to your requirements, as it is of an additive type of assembly. Foot-linear type, graduated and engraved in 16-frame divisions on the 35mm sprocket. A hand sprocket knob is on front of viewer. Sprocket shaft slip lock is provided, as well as an adjustable graduated frame dial to facilitate and speed cutting. Film contact rollers are made of machined dural stock, mounted on a quick finger-tip release yoke. Rollers turn on an eccentric cam adjusting shaft. Film contact rollers are adjusted individually for positive sprocket-to-film-to-roller clearance. Counter is of the forward and reverse reading and reset type. Cast aluminum construction — gray hammer finish.

PRICE \$895.00
